

SMHART SECURITY

Community CCTV initiative

CAPE SAINT FRANCIS

POLE POSITIONS

POLE POSITIONS

Eastern perimeter

- Protected by camera 1, 2 and 6.

Northern perimeter

- Protected by camera 5

- Aided by the airpark fence and Rebelsrus gate.

Western perimeter

- Protected by camera 3, 4 and 8.

POLE POSITIONS

Camera 1

A beach facing pan, tilt and zoom (PTZ) camera with deep analytical abilities. This camera can see 400 meters in a 360 degree direction at night due to its ultra low-light capability. This camera patrols the beach, using motion detection to alert the control room.

Camera 2

An existing camera that will be moved into the foot path to monitor pedestrian entry.

Camera 6

Monitoring unwanted pedestrian entry along the airpark fence, foot paths and bush.

POLE POSITIONS

Camera 4

Bridges the gap between the air park fence and the visibility of camera 3. This camera will monitor the bush and the foot path towards Cape Saint Francis.

Camera 3

Used to extend the visibility of camera 4 and have sight down the remaining foot paths in either direction.

Camera 8

An existing camera used to monitor exit from the foot paths, along the road and vehicle movement.

POLE POSITIONS

Camera 7

A license plate recognition camera that will be moved from pole 8 to allow a wider area of vehicle movement observation.

Camera 5

Another highly analytical and ultra low-light capable pan, tilt and zoom (PTZ) 400 meter camera implemented to observe movement between the end of the Eskom fence and camera 7. It will also be able to detect movement along the road, in the bush at night in any direction and identify number plates.

POLE POSITIONS

Camera 9

An existing intersection camera pole looking along Da Gama and up Osprey. This camera can be used in the network to observe pedestrian exit from the foot paths and vehicle movement.
